In Awetest 2.5 we introduced a new feature that allows users to download all Project Assets (Scripts, Libraries, Custom Steps, Data Source/Excel Files, etc.) for a specific Project. This downloads all the assets into a zip file (that retains the Awetest folder structure) - allowing the user to upload the zip file into a NEW Awetest Project.

This makes the assets very portable allowing users to export and share their assets. This also alleviates the pain of having to download individual scripts and re-upload them one at a time.

<u>Please Note:</u> You will only be able to upload the zip file to a <u>New</u> Awetest project. You will not be able to upload the zip file to a project that has existing assets already added to it.

Step 1: Downloading Project Assets

From the home screen of <u>www.awetest.com</u> go to Management. • awe\\test HOME Today Last 7 Days Last 30 Days All Time 214 73 × 278 2157 01.52 C HS OF TESTING JOBS TESTS PASSED VALIDATIONS Your Activity Stream Active Test Cases 7 Days 30 Days 3 Months All Time WEB JOB WITH 0 SCRIPTS IS QUEUED.

• There you'll see your list of projects and a Download button on the right, click it.
