

This new features adds more customization to projects pm Awetest. Users can now select any feature combination they'd like for any specific project.

See the following document for step-by-step instructions:

- From the home screen of www.awetest.com go to Management. Then click on any of the project names, here we will choose Default Project.

- From here you can now choose to add features to the particular project. Once the options are selected, click Save.

The screenshot shows the AweTest Management interface. On the left is a 'Management' sidebar with options like PROJECTS, USERS, MOBILE NATIVE APPS, WORKERS, DEVICES, LICENSES, ALM SERVER, ANTHILL PRO, SHAMSEN DOWNLOADS, API, and ABOUT. The main content area is titled 'Default Project' and includes a 'DELETE' button. It is divided into three sections: 'Project Versions', 'Users', and 'Project Features'. The 'Project Versions' section lists v2.1, v2.0, and v1.0. The 'Users' section has a table of users with checkboxes for selection. The 'Project Features' section contains various toggleable options for project configuration.

| Name | Actions |
|------|-----------------|
| v2.1 | [Edit] [Delete] |
| v2.0 | [Edit] [Delete] |
| v1.0 | [Edit] [Delete] |

| Add | Name | Role |
|-------------------------------------|----------------|-----------|
| <input checked="" type="checkbox"/> | Aha Aha | corpadmin |
| <input checked="" type="checkbox"/> | sham_archi ok | architect |
| <input checked="" type="checkbox"/> | Design Tester2 | corpadmin |
| <input checked="" type="checkbox"/> | Design Tester1 | corpadmin |
| <input checked="" type="checkbox"/> | tester tester | tester |
