

We've increased the customization with Awetest 2.5 with the addition of test case specific assets. Users now have the option to limit assets (libraries, data) for a given test case and/or share assets across multiple test cases. This includes options to include or exclude predefined libraries for tests.

See the following document for step-by-step instructions:

- From the home screen of www.awetest.com go to Web > Test Cases.

The first screenshot shows the Awetest 2.5 home dashboard. The top navigation bar includes links for HOME, WEB, mWEB, mAPP, SERVICES, MANAGEMENT, and FAQ. The 'WEB' link is highlighted with a red box. Below the navigation bar, the dashboard displays four key metrics: 214 JOBS, 73 of 278 TESTS PASSED, 2157 VALIDATIONS, and 01.52 HS OF TESTING. On the right, there are buttons for 'CREATE TEST CASE' and 'SCHEDULE JOB'. The main content area is divided into 'Your Activity Stream' and 'Active Test Cases'.

The second screenshot shows the 'TEST CASES' page, which is reached by clicking on the 'TEST CASES' link in the top navigation bar (highlighted with a red box). The dashboard layout is similar to the first screenshot, but the 'Your Activity Stream' is now titled 'Your Web Activity Stream' and the 'Active Test Cases' section shows a table of test cases.

	7 Days	30 Days	3 Months	All Time
IE	46			
tc2	35			
tc1	34			
for ie	10			

- Once you click on a specific test case you can choose to limit assets and libraries, or share the assets and predefined libraries across multiple test cases. To do this either check or uncheck the corresponding boxes, then click Update.

The screenshot displays the 'awe\\test' web application interface. The top navigation bar includes links for HOME, WEB, mWEB, mAPP, SERVICES, MANAGEMENT, and FAQ. Below this, a secondary bar shows DASHBOARD, TEST CASES, JOBS, REPORTS, and ASSETS. The main content area is titled 'Web » Test Cases'. On the left, a 'Test Cases' sidebar lists categories like CUCUMBERIE, IE, ie2, AWETESTLIB, and CUCUMBER OUTLINE SCENARIO. The main panel shows details for a test case named 'IE'. It includes a 'Scripts' section with a table of script history, a 'Documents' section, and an 'Assets' section. The 'Assets' section is highlighted with a red box and contains the text: 'Add, manage custom libraries & data specifically for this test case', two checked checkboxes for 'Use the Project Assets' and 'Use Pre-Defined Awetest Libraries', and an 'Update' button. A callout box at the bottom provides a magnified view of the 'Assets' section, showing the same content and the 'Update' button.

File Name	Project Version	Script Type	Total Coverage	Updated
